AND SPACE TECHNOLOGY

## FOREWORD.

---

The previous issue of the Quarterly Summary of Australian Statistics, No. 240, published on 21st July, 1961, contains statistics up to June, 1960. This issue, containing statistics up to June, 1961, wherever practicable, combines the usual four quarterly issues for the period between.

As it would not have been possible to include in this issue all the relevant data for the period July, 1960, to June, 1961, without unduly increasing the size of the publication, breaks in the continuity of some statistical series have occurred. Statistics for any periods thus omitted are available in the publications referred to below, or are obtainable on request.

Inside the back cover are shown the dates of issue and prices of the latest printed publications issued by this Bureau. In addition, mimeograph publications are currently produced on the following subjects coming within the present scope of the Quarterly Summary:—

## SECTION 1.—POPULATION AND VITAL STATISTICS.

**NOTE.—Estimated Population of States.**—For dates subsequent to the Census of 30th June, 1954, the estimated population in each State represents the population ascertained at the Census plus natural increase and recorded net migration into the State since the Census. As complete records of interstate migration are not available, the estimated State populations so derived are approximate and are subject to revision when the actual population of each State is ascertained at the Census of 29th–30th June, 1961. For some States such revisions were substantial after the Census of 1954.

## COMMONWEALTH SALES TAX—SALES OF GOODS AND TAX PAYABLE.

NOTE.—An indication of fluctuations in the value of wholesale trade is given by the returns made under the Sales Tax Acts. With certain specified exemptions, all goods sold by wholesale in Australia, including imports, are taxable. The returns do not relate to all wholesale trade, as vendors trading only in exempt goods are not required to furnish returns. They do not necessarily cover a constant proportion of all trade. The effects of legislation and administrative changes on the recorded values of taxable and exempt goods respectively are somewhat uncertain, but total recorded sales are affected in smaller degrees. Insufficient information is available to enable adjustments to be made to the crude figures on this account.

There are other relatively minor payments for which adjustments have not been made and the adjusted figures are therefore still slightly overstated. (c) Includes payments to State trust funds. (a) Without interstate duplication. The State figures do not add to the Australian total because a union represented in more than one State is included in the figure for each State in which it is represented, but is counted only once in the Australian total.

AVERAGE WEEKLY TOTAL WAGES AND SALARIES PAID  
AND AVERAGE EARNINGS.(a)

The following figures are derived from employment and wages recorded on Pay-roll Tax returns (which cover approximately 75 per cent. of the estimated number of civilian wage and salary earners in employment), from other direct collections and from estimates of the unrecorded balance. Pay of members of the Defence Forces is not included. An index of average weekly earnings, seasonally adjusted, is published in the *Monthly Bulletin of Employment Statistics* and the *Monthly Review of Business Statistics*.

(a) Includes, in addition to wages at award rates, earnings of salaried employees, overtime earnings, over-award and bonus payments, etc. (b) Includes the Australian Capital Territory.

(c) Includes the Northern Territory. (d) Total wages and salaries, etc. divided by total civilian employment expressed in male units. Male units represent total male employment plus a proportion of female employment based on the approximate ratio of female to male earnings. As it is not possible to estimate the ratio of female to male earnings in the several States, the same ratio has been used for each State. Because the actual ratio may vary between States, precise comparisons between average earnings in different States cannot be made on the basis of the figures above.

NOTE.—Comparisons as to trend should be made for complete years or corresponding periods of incomplete years. Quarterly totals and averages are affected by seasonal influences.

## NEW INDEXES OF MINIMUM WAGE RATES AND HOURS OF WORK.

NOTE.—The indexes of nominal weekly and hourly wage rates and hours of work for adult males and adult females published in issues prior to No. 237, September, 1959, used as base periods the year 1911 for adult males and 30th April, 1914, for adult females. The indexes for each industry were the unweighted averages of selected occupations. These industry indexes were combined into aggregate indexes by using industry weights current in or about 1911.

The indexes so compiled were replaced, as from September, 1959, by new indexes embracing a more representative range of occupations closely related to current conditions as from 1939 for adult males and 1951 for adult females.

Each of the occupations included in the new indexes was individually weighted. From the wage rates and hours of work for these occupations weighted averages were calculated for each industry, and these were then combined into weighted averages for all groups. In the following tables the weighted averages so calculated are shown in shillings and pence and also as index numbers with the weighted average for the year 1954 as base (= 100).

A brief explanation of the methods by which the data for the new indexes were obtained and of the system of weighting was given in Statistical Bulletin No. 736—*New Indexes of Minimum Weekly Wage Rates—Adult Males and Adult Females*, 19th February, 1960. This bulletin also contained tables showing, for each industrial group for Australia and for all groups combined for each State, the weighted average minimum weekly rates of wage and index numbers with the weighted average for the year 1954 as base (= 100), as at the end of each quarter from 31st March, 1939 (for adult males) and 31st March, 1951 (for adult females). Information on the components of the total wage rate is contained in Statistical Bulletin No. 902—*Minimum Weekly Wage Rate Index—Components of Total Wage Rate*.

Particulars for each month from January, 1957, and revised figures for 1958 and subsequent years, were published in the Statistical Bulletin *Minimum Weekly Wage Rates, January, 1957 to June, 1961*.

Current information is contained in the *Monthly Bulletin of Employment Statistics*.

## WHOLESALE PRICE (BASIC MATERIALS AND FOODSTUFFS) INDEX.

Commodities in this index are priced in their primary or basic form wherever possible. The prices used have, in the main, been obtained directly from manufacturers and merchants and, with a few important exceptions, from Melbourne sources. Apart from locally produced building materials and one or two minor commodities, however, the price movements may be taken as representative of variations in wholesale prices of basic materials in most Australian markets. The weighting system adopted is based on estimates of the average annual consumption of the commodities in Australia during the years 1928-29 to 1934-35 inclusive.

(Base of each Group : Average of 3 years ended June, 1939 = 100.)

## FARM PRODUCTION PRICE INDEXES.

The annual indexes shown in the following table relate to average "prices" of farm products realized in the principal markets of Australia. The "price" data used are average unit values for the total quantities of the relevant commodities produced or marketed in each year and the indexes therefore measure both the effects of changes in prices (as such) and of variations in the quality, type, usage, etc., of products marketed. The indexes for any year relate to the average values of farm products produced or marketed in that year, irrespective of the periods in which payment is received by producers.

The indexes shown below are the Revised Series (December, 1952) in which average quantities of each product marketed in the period 1946-47 to 1950-51 have been used as fixed weights.

The preliminary indexes for 1960-61 are based mainly on the recorded or estimated movement in average values for the major farm products. They will be reviewed from time to time as further "price" data become available.

(Base: Average of 3 years ended June, 1939=100.)

## EXPORT PRICE INDEX NUMBERS.

These index numbers are compiled from the prices of 20 commodities which normally constitute about 80 per cent. of all exports. In general the index numbers show price changes in the predominant market or markets for each commodity, but average prices realized for exports are used for some markets.

## RECENT TRENDS.

The group indexes show the great fluctuations and the wide dispersion of prices of export commodities in recent years. Since wool is a predominant export (and comprises 45.63 per cent. of the base aggregate of the index), fluctuations in wool prices obscure the effect of movements in prices of the other components on the "All Groups" Index. For this reason the combined effect of price movements in these other components is shown separately in the column "All Groups excluding Wool".

## SIMPLE AGGREGATIVE INDEX: FIXED WEIGHTS.

In this index the weights are the average annual exports of each commodity (production in the case of gold) during the three years 1933-34 to 1935-36.

(Base of each Index: Average of 3 years ended June, 1939 = 100.)

(a) Silver, copper, tin, zinc, lead. (b) Beef, lamb, mutton, pork. Guaranteed minimum prices are used when operative. (c) Sultanias, raisins, currants. (d) Cattle hides, calf skins. (e) Preliminary. (f) Actual prices realized not yet fully known; provisional series are included in the "All Groups" Indexes.

NOTE.—The "fixed weights" index numbers above indicate satisfactorily the general trend of export prices, but take no account of the relative quantities actually sold at the prices ruling in particular months. An index with "changing weights", which takes account of this factor, is published in a footnote to the Export Price Index in the *Monthly Review of Business Statistics*.

## SECTION XII—STATISTICAL SUMMARY.

## STATISTICAL SUMMARY—AUSTRALIA, 1891-92 to 1959-60.

NOTE.—(1) In most cases where figures are available back to 1861, these were shown in the September, 1953 issue of the *Quarterly Summary of Australian Statistics*, pages 112 and 113.

(2) The statistics in this summary relate in general to the periods shown in the table headings; where the statistics relate to other periods, this is indicated in footnotes.
